

# PRESS RELEASE – 31ST MAY 2016

## **Borderless Hub Showcases Spreedbox – Most Private and Secure Video Conferencing and File Sharing Solution with no Subscription Fees – at CommunicAsia 2016**

Borderless Hub Pte Ltd in conjunction with Spreedbox Pty Ltd will showcase Spreedbox, a secure private video conferencing, messaging and file exchange solution underpinned by quantum computer resistant cryptography. Spreedbox allows users to communicate with each other directly, without the need to use an external server or provider. With Spreedbox, except for the cost of internet connectivity and electricity, there are no additional fees, subscriptions or recurring cost.

A key feature of the digital environment today and for the foreseeable future is the extensive use of the cloud for data storage and web collaboration. Spreedbox offers users a private cloud for data storage and file exchange, up to 10 concurrent secured video meeting sessions through a web browser or mobile app, with up to 6 attendees in each session.

The casing for Spreedbox is made from a single aluminium block. Its shape and design reflects the integrity of its software; clear and pure. Spreedbox is built on Open Source software, for greater transparency, flexibility, improved quality and reduced business risk.

For additional security, Spreedbox features a Secure Key Hardware Random Number Generator and it is shipped with the Iridium Secure WebRTC browser. As well as for personal use, Spreedbox is suitable for use in the financial, medical, homeland security and government sectors.

Spreedbox is redefining video conferencing and collaboration over the web with a refreshingly easy user-interface, exceptionally clear video (up to 1080p) and unparalleled encryption technology.

Visit booth BD3-01 and regain control of your data: enjoy the benefits of accessing your data from the cloud, experience the future of P2P conferencing, collaboration and document sharing in a secured environment.

Borderless Hub Pte Ltd has been appointed a distributor for Spreedbox in South East Asia, Africa and Mexico.

### **About Spreedbox Pty Ltd**

Spreedbox Pty Ltd ([www.spreedbox.me](http://www.spreedbox.me)) is a technology company. We offer solutions that gives users and businesses control of their own private cloud, away from prying eyes. Spreedbox, a self-hosted server, is a secure and quantum computing resistant video conference and private cloud solution. It is based on an Open Source platform and developed in Germany by some of the most experienced engineers in the field.
